74

- Fix Instacrash on bridgeless due to calling showMessage on null instance
- Allow non-ascii header values on Android and add utf-8 filename fallback in FormData
- Fix InteropBridgedListener to support react-native-view-shot on bridgeless
- Fix android:horizontalScrollView flag when content length less than ScrollView length
- Fixed prefab header paths for 'rnc\_text' and 'rnc\_textinput'
- Fix build from source for hermes-engine
- Fix bridgeless configuration to include DebuggingOverlay in react packages
- React-Native-React in release
- Fix not crash on onShareIntentReceived when fast-refreshing on bridgeless mode
- Re-enable listing Hermes debugger targets in chrome://inspect, broken in 0.74 RC
- Fix registration of ViewManagers in new renderer when not using LayoutManagers.
- MultiInterceptException is no longer ignored in WebsocketHandler
- Properly handle RN and OCM in Bridgeless mode
- Bring back the UNST constant to TextAttributePropa.
- Fix bridge mode by constructing ReactDelegate correctly.
- Fixed possible deadlock in dispatchViewUpdates

#### more iOS specific

- Resolving case sensitivity issue in header file import
- Pass the right flags to libraries
- Make sure that `addBlock` provides a Dictionary-like object that returns the right views when queried.
- Perf monitor option not showing in bridgeless
- Make sure to forward touches to the wrapped component in the InteropLayer.
- Generate the RCTModulesConformingToProtocolProvider only once in user space
- Make sure that `Modal` is dismissed correctly in Paper
- Fixed support for event name override in component specs.
- Make `RCTBridge` currentBridge work in bridgeless mode
- Initialize the `allPongers` in the main queue and when we need it.
- Make font resolution work when using specific font name on the new architecture
- Disable the "Open Debugger" item from dev menu if packager is disconnected
- Don't add compiler conditionals when no platform are specified
- Fix TextInput vertical alignment issue when using lineHeight prop on iOS without changing Text baseline (Paper - old arch)
- Align the bundleURL API from `RCTAppDelegate` to template's `AppDelegate`
- Bring back support for defining external libraries in react-native.config.js
- Immediately set props of Components that goes through the Interop Layer
- `[ ]` Fixes the root view's background color in bridgeless mode
- Fix retrieving current appearance in multi-window apps
- Refactored `RCTHeadlessCommand` to avoid concurrency issues
- Fixed potential threading issues accessing UIKit from background in `RCTAlertManager`
- Fixed `StyleSheetConversion` build error from Swift integration
- iOS Add React-debug to ReactCommon.podspec
- Remove an early return to suppress a deprecated API warning for `UIViewController`
- Bring the old `RCT_NEW_ARCH_ENABLED` semantic back for compatibility
- Fixed archiving for macos catalyst on react-native 0.73.1 in xcode
- Fix `RCTAppletUpPrepareApp` import error from Objective-C \*.m files
- Fixes `with-environment-id` script for the case when Node can't be found prior to loading `.xcode.env`
- Further cleaned up `RCT_USE_HERMES`
- Fix support for `sourceMapOutputPath` containing spaces
- Move old `Pinus` and `Arno` diffing to the Interop Layer adapter
- Optimize `RCTKeyWindow` calls in `RCTForceTouchAvailable` method
- Fixed strict prototype warning when using the `RCT_EXTERN_MODULE` macro.
- Add safe guard when receive network response data too long
- The wrong height result of `onContentSizeChange` callback
- Fix `createElement` error
- Fix `ScrollView` contentInsetAdjustmentBehavior assignment
- Network invalidate handlers. to cleanup in turbo module mode
- Move `detachSheet` UI operation to main thread
- Move `UIAccessibilityCapabilities` for `MenuItem` to `aria4`
- Remove duplicated category `RCTTextStorageFontScaling`
- `setStyle` is not working for nested inline views in text
- `onPress` Callbacks build
- `setStyle` is not working properly for text inline image
- Fix `rendering` errors when the proximity sensor detects close
- Fixes Dev menu pop up multiple times when Tap command `Q` continuously
- Fix module create dead-lock when start-up
- Adjust `RCT Hermes` to work for `iPhone` and support orientation changes
- Fix `autoScrollToTopThreshold` on iOS old arch
- Fix iOS Paper Scroll Event RTL check
- New file horizontally in paper arch on RTL
- Fixed narrowing conversion compilation error.
- Fix grammar in `ios` 13 helper method name
- Prevent unwanted border animation
- Adding `cache_clang` wrapper scripts to package.json for distribution
- Detouple `RCTBridgePrivate` from `isInspectorModule`
